

One captured 2,407-byte DNP3 READ response

Both rows carry the identical bytes; only the TCP segmentation differs. Bar width is proportional to bytes.

Native OpenDNP3 segmentation

9 link frames (up to 292 B each)

CRC-boundary split, 1 block/chunk

141 chunks (at most 18 B each)

Granularity sweep (blocks per chunk)

bpc=1 -> 141 chunks bpc=2 -> 71 chunks bpc=4 -> 36 chunks bpc=8 -> 18 chunks

Every granularity accepted by the master

800 measurements delivered, DNP3 CONFIRM returned, 0 TCP retransmissions, 0 resets, byte-preservation PASS
